

Complaint Handling & Escalation Process

Standard workflow for logging, resolving, and escalating customer complaints.

Document ID	KB-CS-003	Version	v1.4
Owner	Customer Experience Team	Last Updated	22 Sep 2026

1. Complaint Intake

- Customer raises an issue with the order ID and a description of the problem, through any support channel.
- The agent logs the complaint in the case management system with a category tag (delivery, payment, product quality, seller conduct, other).
- An acknowledgement with a case reference number is sent to the customer immediately.

2. Resolution Workflow

- Step 1: First-line agent reviews order history, delivery status, and any prior related tickets.
- Step 2: Agent proposes a resolution (refund, replacement, compensation, information) within the documented SLA for that complaint category.
- Step 3: If the customer disputes the proposed resolution, the case is escalated to a Senior Support Specialist for review.
- Step 4: Cases involving potential fraud, safety, or repeated seller violations are routed to Trust & Safety.

3. Escalation Triggers

Trigger	Escalation	Target Response
Unresolved by 1st agent	Escalate to Senior Support Specialist	Within 24 hours
Customer dispute	Escalate to Trust & Safety	Within 48 hours
Suspicious activity	Escalate to Trust & Safety	Within 24 hours
Repeated seller complaints	Escalate to Trust & Safety	Within 72 hours

4. Closing a Complaint

A complaint is only marked resolved once the customer has confirmed the outcome, or after 3 documented attempts to reach the customer for confirmation have failed. All resolved cases are retained in the system for 12 months for audit and training purposes.

Note: Agents should never close a complaint as “resolved” without either explicit customer confirmation or a documented final action (refund issued, replacement dispatched, etc.) attached to the case.

This is a sample/demo policy document generated for knowledge-base and chatbot training purposes. It is illustrative content, not an official Daraz publication.
