

Courier Partners & Delivery Zones

Overview of logistics partners, service coverage, and zone classifications.

Document ID	KB-DEL-002	Version	v2.1
Owner	Logistics Operations	Last Updated	29 Jul 2026

1. Delivery Zone Classification

Zone	Description	Example Areas
Zone A	High-density urban	New Karachi, Dera Ismail Khan, Islamabad city core
Zone B	Major cities	Faisalabad, Lahore, Multan, Peshawar, Hyderabad
Zone C	Suburban	Surrounding areas of major cities
Zone D	Remote towns	Small towns with courier hub access
Zone E	Restricted areas	Border areas, sensitive zones, extended-delivery partners

2. Fulfilment Network

- Daraz Fulfilment Centres store fast-moving inventory close to major demand hubs to enable next-day and 2-day delivery in Zone A.
- Seller-managed warehouses ship directly to the courier network from the seller's registered pickup location.
- Regional sortation hubs consolidate shipments before last-mile handover to reduce transit time.

3. Last-Mile Delivery Partners

Last-mile delivery is handled through a network of contracted courier and logistics partners, selected by serviceability, cost, and reliability for a given postal zone. The assigned courier partner for a specific order is visible on the order tracking page.

4. Cash-on-Delivery (COD) Zone Restrictions

COD is available across most Zone A and Zone B areas. In select Zone C and Zone D areas, COD may be capped at a maximum order value or unavailable altogether due to cash-handling risk; in such cases, only prepaid payment methods are offered at checkout.

5. Address Serviceability Check

- Serviceability is checked automatically at checkout using the delivery postal code.
- If a postal code is not serviceable for a given product (e.g. bulky item to a remote zone), the product listing will display "Not deliverable to this address".
- Customers can update their delivery address before checkout to check alternate serviceability.
