

Accepted Payment Methods

Supported payment options at checkout and their associated processing rules.

Document ID	KB-PAY-001	Version	v3.1
Owner	Payments & Fintech Team	Last Updated	05 Sep 2026

1. Supported Payment Methods

Method	Description	Refund Path
Cash on Delivery (COD)	Pay on delivery, no card details	Return to sender
Visa, Mastercard	Online payment, original card accepted	Refund to original card
Bank Transfer	Direct transfer to bank account	Refund to bank account
Digital Wallets	QR-based payments	Refund to wallet
Daraz Wallet	Platform-specific wallet	Refund to wallet
Installment Plan	3/6/12 month plans	Refund to bank

2. Payment Security

- All card transactions are processed through PCI-DSS compliant payment gateways.
- Card details are never stored on platform servers; tokenisation is used for repeat purchases.
- 3-D Secure (OTP) verification is required for most card transactions.

3. Failed or Pending Payments

If a payment is deducted but the order shows as failed or pending, the amount is typically auto-reversed by the issuing bank within 5–10 business days. If the reversal does not appear after this window, the customer should raise a payment dispute ticket with the bank transaction reference number.

4. Installment Plan Eligibility

- Available only on select cards from partner banks.
- Minimum order value thresholds apply and are displayed at checkout.
- Markup/interest terms are set by the issuing bank, not by the platform.

Note: Available payment methods may vary by product category, order value, and delivery zone — not all methods are shown for every order.

This is a sample/demo policy document generated for knowledge-base and chatbot training purposes. It is illustrative content, not an official Daraz publication.
