

Payments — Frequently Asked Questions

Common customer questions about payments, answered for quick agent reference.

Document ID	KB-PAY-003	Version	v1.6
Owner	Payments & Fintech Team	Last Updated	20 Sep 2026

1. Payment Deduction & Order Status

Q: My payment was deducted but the order shows as failed. What happens now?

A: This is usually a temporary authorisation hold rather than a completed charge. If the order did not confirm, the hold is automatically reversed by the bank within 5–7 business days without any action needed from the customer.

2. Changing Payment Method

Q: Can I change my payment method after placing an order?

A: No. The payment method cannot be changed once an order is placed. The order must be cancelled and re-placed with the desired payment method.

3. Card Safety

Q: Is it safe to save my card details on the platform?

A: Yes. Saved cards are tokenised through a PCI-DSS compliant payment gateway; the platform does not store raw card numbers or CVV on its own servers.

4. Duplicate Charges

Q: I was charged twice for the same order. What should I do?

A: Duplicate charges are typically a display issue on the bank's end rather than an actual double charge. The customer should raise a ticket with both transaction references; the Payments team will verify with the gateway and refund any confirmed duplicate within 5–10 business days.

5. Installment Plans

Q: Why don't I see installment options at checkout?

A: Installment plans are only shown for eligible cards from partner banks and orders meeting the minimum value threshold; eligibility is checked automatically.

Agent tip: Always ask for the transaction reference number and last 4 digits of the card/account before escalating any payment discrepancy to the Payments team.
